

## Editors' letter

This is the 6<sup>th</sup> year of publishing the Journal. It is gratifying to note that its prestige is growing every year, and we receive more and more articles submitted for publishing. Last year, the number of submitted articles increased more than three-fold. Thereupon, it was decided to increase the number of the journal issues: three issues will be published in 2015, and quarterly publishing is planned starting 2016. The special journal with the articles for a limited audience will be further published in the Corporation. The journal is published when sufficient number of articles is collected.

Though the number of issues will be increased, we are not going to reduce the requirements to the manuscripts as relate either to their scientific level or to their execution quality. Our annual best article competition is aimed at improvement of the articles' quality as well. The winners receive the Corporation's certificates of honour and prizes.

We are looking forward to your new interesting scientific articles, as well as feedback regarding the Journal and proposals for its improvement.

Best regards,  
Editor-in-Chief

**Gennadiy Kozlov**

The Editorial Board made a decision to publish full text articles of the Journal of "Almaz – Antey" Air Defence Corporation in the public domain on the Internet starting 2015. It is ensured based on the Russian Index of Science Citation (RISC) on the [elibrary.ru](http://elibrary.ru) platform recommended by the Higher Attestation Commission of the Ministry of Education and Science of the Russian Federation.

More than 30% of the regularly published domestic research journals provide free access to the full text articles in RISC. Experience has proved that it is beneficial for the scientometric indicators of the journal and authors.

We would like to draw the authors' attention to the fact that accurate calculation of the scientometric indicators implies checking each reference in the Bibliography section for meeting the requirements of GOST R 7.0.5–2008 "System of standards on information, librarianship and publishing. Bibliographic reference. General requirements and rules of making."

Best regards,  
Deputy Editor-in-Chief
